## From the Founders

As the Founders of Only Orb Luxe Products, we have always been drawn to beautiful, timeless product. Our belief is that such elements within the home enhance a commodity high on most people's wish list - a harmonious lifestyle.

With backgrounds in business and design as well as a passion for product, we designed the Orbs for one clear reason, to fill a niche in the marketplace where unique and exclusive handmade products were absent.

Our desire to produce a modest vessel made from raw, yet luxurious material, saw the evolution of the refillable teak orb shortly followed by the classic ceramic collection.
